Deep Dive: The Magical World Of Functional Programming- Part II

Synopsis

The second part of "The Magical World of Functional Programming" invites readers to take a deep dive into this fascinating way of writing programs. The book explores control abstraction, data abstraction and other advanced topics. The book also presents a complete parser combinator library that can be used to create domain specific languages. And what's more, as in the first part of this series, all the code has been written in good old JavaScript!
