# Use Case Driven Object Modeling With UML Theory And Practice

## Synopsis

Diagramming and process are important topics in today's software development world, as the UML diagramming language has come to be almost universally accepted. Yet process is necessary; by themselves, diagrams are of little use. Use Case Driven Object Modeling with UML - Theory and Practice combines the notation of UML with a lightweight but effective process - the ICONIX process - for designing and developing software systems. ICONIX has developed a growing following over the years. Sitting between the free-for-all of Extreme Programming and overly rigid processes such as RUP, ICONIX offers just enough structure to be successful.

## Customer Reviews

A bio is not available for this author. Matt Stephens is a Java developer, project leader, and technical architect with a financial organization based in central London. He's been developing software commercially for over 15 years, and has led many agile projects through successive customer releases. He has spoken at a number of software conferences on object-oriented development topics, and his writing appears regularly in a variety of software journals and websites, including The Register and ObjectiveView. Matt is the co-author of Extreme Programming Refactored: The Case Against XP (Apress, 2003) with Doug Rosenberg, Agile Development with ICONIX Process (Apress, 2005) with Doug Rosenberg and Mark Collins-Cope, and Use Case Driven Object Modeling with UML: Theory and Practice with Doug Rosenberg (Apress, 2007).
