Introduction To Java Programming, AP Version

Synopsis

For courses in Java Programming. **Java Programming Concepts for AP Computer Science A** Written for AP students, *Introduction to Java Programming: AP Edition* covers all Java programming material and concepts required as part of the AP Computer Science A curriculum. Daniel Liang teaches concepts of problem-solving and object-oriented programming using a fundamentals-first approach and effectively communicates critical problem-solving techniques to beginning programmers. The text focuses on problem solving through Java programming and emphasizes both imperative and object-oriented problem solving and design. It is divided into two parts: in the first, students learn the fundamental concepts and techniques of selection statements, loops, methods, and arrays, before building on this foundation in the second part, as the text introduces concepts of object-oriented programming. Because knowledge is cumulative, the early chapters provide the conceptual basis for understanding programming, guiding students through simple examples and exercises; subsequent chapters progressively present programming and problem solving in more detail, culminating with the development of comprehensive applications. Throughout the text, understanding of Java concepts is supported by frequent practice and the use of relevant examples. Also Available with MyProgrammingLab [®] MyProgrammingLab is an online learning system designed to engage students and improve results. MyProgrammingLab consists of a set of programming exercises correlated to the programming concepts in this book. Through practice exercises and immediate, personalized feedback, MyProgrammingLab improves the programming competence of beginning students who often struggle with the basic concepts of programming languages. Note: You are purchasing a standalone product; MyLab [®] & Mastering [®] does not come packaged with this content. Students, if interested in purchasing this title with MyLab & Mastering, ask your instructor for the correct package ISBN and Course ID.
